

Looking to expand your students' connections to possible careers?

Have you considered the opportunities that exist within agriculture? While 23 million people work in agriculture, 98% of them work in areas outside farming and production agriculture. Every year over 48,000 people are needed to fill positions in ag careers.

Ag careers offer lots of opportunity, however many students never consider an agricultural career because they don't know that they exist.

Would you be willing to expose your students to the opportunities available within Ag Careers?

Connect with a member of your local agricultural community.

Today's farmers want to ensure tomorrow's workforce is equipped to help them meet the demands of feeding a growing population. We want to make sure today's students are given the opportunity to see how their interests could connect to a career in the exciting agricultural field.

The purpose of our interactive presentation is to engage students and enlighten them about the abundance of careers available and hopefully entice them to explore their options in agriculture.

Give your students the knowledge needed to start them on the path to a rewarding career in agriculture!
