

Science Learning Center

Skills:

Identification
Classification

Standards:

3.1.A
4.1.A
4.3.A
4.4.B
4.5.A

Activity:

Students will identify plants used by people to meet their needs.

Students will sort food products by the part of the plant that provides it.

Materials:

- * activity page (www.pfb.com/2020ALW)
- * scissors
- * glue

Science: Uses of Plants

For people to have food, farmers grow plants (crops) and raise animals (livestock).

Plants have different parts to them. The foods we eat from plants come from different parts of plants.

Sort each item into the correct part of the plant where it grows.
