

# LINKS TO AGRICULTURE

## Where's The Juice?

Your body needs certain nutrients to run in tip top shape. Some of these nutrients are found in fruits and vegetables.

Why do you need fruits and vegetables??? Fruits and vegetables hold many vitamins,

and each vitamin has a job to do...

**Vitamin** A for healthy eyes, lungs and skin and to help resist infections is found in orange, yellow, and green fruits and vegetables.

Vitamin C for healthy gums, for healing cuts and burns, and to help resist infections is found in raw fruits and vegetables.

Vitamin K for normal blood clotting and healthy bones is found in leafy vegetables.

**Vitamin E** to protect our body's cells and tissues from damage is found in leafy vegetables

Many of us like to drink juice, which is one way to consume these important components. But just like there is junk food and healthy food, there are healthy beverages and not so healthy beverages.

### How do you know if it's healthy or not??

Every food and drink item has to have a nutritional label. So look at the labels!

- ♦ Go for drinks that say 100% Juice
- $\diamond$   $\;$  Go for drinks that have Reduced Sugar written on them
- $\Diamond$  Drink any juice in small amounts,  $\frac{1}{2}$  a cup to 1 cup is plenty at one time

### Try This At Home!!

### Strawberry Fluff Recipe

Ingredients

- 16 oz . Fresh or frozen strawberries
- 1 pkg. colored marshmallows
- 1 large tub of Cool Whip
- 1/4 cup sugar

#### You will need:

#### Farm Facts

- Apple trees begin to bear fruits within three to ten years.
- Apple trees can bear fruits for up to a hundred years.
  However, most growers replace the trees in the orchards every forty or fifty years.
- A single peach tree may produce from 4 to 10 bushels of peaches per year.

# Name the benefits of each vitamin and where it can be found!

Benefits Where are they Found?
